

# State Representatives

Name and Number: \_\_\_\_\_

In the last lesson we learned about representative government and who represents us in our local community, but what about at the state level? Can you name the leader, or governor, of our state government? That one is easy! Almost everyone knows who the governor is and everyone in the state had the chance to vote for him. What about the representatives from your community that are in Lansing to work with the governor? Do you know who your local representatives are?

Even though you are all third graders, that go to the same school, you live in different communities and may have different representatives. Use the three button on the web site to enter your zip codes and find out who is representing your community up in Lansing. Once you know who your representatives are, let me know what information you can find out about this person.

# Capitol Building

## Senate

There are 38 state senators who are elected from communities between 212,400 to 263,500 residents
