

Michigan's Great Lakes

Name & Number: _____

It's not called "The Great Lakes State" for nothing! Did you know that we are surrounded by the World's largest supply of freshwater. In fact, one fifth of all the World's fresh water is in the Great Lakes. That means six quadrillion gallons of fresh water, that's 6,000,000,000,000,000! Lake Superior alone holds half of that amount. It's not just the amount of water that make the Great Lakes great. In this section we will learn many more awesome facts about these five lakes. Let's start with a little quiz to see what you already know about the Great Lakes...
